Laura M. Padgett

Senior Product Manager | 0-to-1 Builder and Fast Prototyper | Discovery-Led, AI-Fluent

San Diego, CA (Remote) · laura@fanspark.pro · linkedin.com/in/laura-m-padgett

SUMMARY

Product manager with 10 years of SaaS and digital product experience and four 0-to-1 launches across B2B, B2C, and B2B2C models. Starts with the user's problem, prototypes fast, and measures success in outcomes rather than features shipped, turning messy starting points into shippable products. Hands-on with AI for research, prototyping, and building systems that run real work.

- **Outcomes over output:** 80% improvement in onboarding completion, 40% lift in conversion, and ownership of pricing and revenue.
- **Discovery-led:** Runs user and client feedback sessions, turns validated problems into requirements, and says no to ideas that don't hold up.
- **Builder mindset:** Builds and ships product features directly in Claude Code, and tests them with users before scaling them up.
- **End-to-end ownership:** Roadmap, requirements, design partnership, release decisions, launch, and measurement.
- **Clear communicator:** Presented plans and results to Amazon, Disney, Google, and Sony, and explains technical tradeoffs in plain language.

SELECTED AI BUILDS

Bedtime with Lumi, AI-assisted children's YouTube channel (2026, in progress)

- Designed a six-stage AI-assisted production pipeline (script, voiceover, visuals, music, editing, thumbnail) for a bedtime channel for children under 5, built around a recurring star character.
- Created a custom character voice in ElevenLabs with locked model settings, so every episode sounds consistent across production runs.
- Set the channel up as COPPA-compliant and Made for Kids from day one; writing the first episodes by hand to define the standard a planned script-writing agent will follow.

Churn Radar (Claude Code, 2026, in progress)

- Building a subscriber churn tracker solo in Claude Code, scoped and designed as a real product with the goal of getting it into users' hands.

Freelance client builds (AI-assisted development)

- Scope, design, and ship websites, marketing pages, and lightweight apps for independent clients using Claude Code, from client discovery through handoff and iteration.

EXPERIENCE

Founding Product Manager | **FanSpark** | Remote (MN) *Feb 2024 – Present*

Subscription platform connecting sports creators with their most dedicated fans.

- Took the product from zero to MVP launch on web in 9 months as the sole PM; now building the iOS app and video streaming.
- Now one of two builders shipping the product directly with Claude Code, taking features from requirements through build, testing, and release without a separate engineering team.
- Run discovery with creators and fans, and turn validated problems into requirements covering the user problem, success metric, scope, and constraints.
- Led the original development team of 3 front-end, 3 back-end, and 1 QA engineer through the MVP launch: owned the roadmap, wrote user stories and acceptance criteria, and made release decisions.
- Own the revenue model, including pricing, checkout, renewals, and creator payouts on Stripe, and track adoption, conversion, and retention in Amplitude and Excel.
- Defined the two-sided marketplace foundation, including Auth0 tiered creator approval and MCP integrations connecting Slack, Gmail, GitHub, and Figma.
- Mentored a Junior PM and a Product Owner on discovery, requirements, and backlog management.

Senior Product Manager | **CreatorSpace** | Remote (CA) *Apr 2021 – Dec 2023*

Multi-tenant SaaS platform that gave creators and their teams one place to manage, analyze, and grow across social platforms.

- Improved onboarding completion by 80% by using funnel data to find where users got stuck and iterating quickly with prototypes.
- Shipped an AI support assistant that cut support tickets by roughly 80% and brought response times close to instant.
- Mapped current and future state workflows with operations and customer-facing teams, and used the gaps to shape the roadmap.
- Partnered with designers on user-centered flows, and led up to 20 agency engineers, then an in-house squad of 12 engineers.
- Set north star metrics tied to activation and revenue, and used cohort analysis to decide where to invest next.

Project/Product Manager | **Taynessa, Inc.** | FL *Aug 2015 – Dec 2021*

Creator-focused digital media and campaign agency serving global consumer brands.

- Ran 30+ brand and creator campaigns for Amazon, Disney, Google, and Sony Home Entertainment, coordinating launch across creators, clients, and internal teams.
- Led strategy and launch of a consumer-facing e-learning product in partnership with Google, from requirements through go-to-market.
- Increased creator conversion rates by 40% through A/B testing and data-informed iteration.
- Led client discovery and pre-sales, including proposals, SOWs, and estimates, and negotiated creator, brand, and licensing agreements.
- Grew creator YouTube channels to millions of subscribers through content and audience experiments.

Founder | **Bbrands!, LLC** | Remote *Nov 2019 – Dec 2020*

Private label ecommerce brand.

- Took a consumer product from market research and design through production, logistics, and online launch.

SKILLS

Product: Discovery, User and Client Feedback Sessions, Requirements, Roadmaps, User Stories, Acceptance Criteria, Release Planning, Launch Coordination, A/B Testing, Onboarding and Adoption, Subscription Monetization

AI: Claude, Claude Code, Model Context Protocol (MCP), AI agents, multi-agent pipelines, ChatGPT, Google Gemini, Microsoft Copilot, Notion AI
